

Rhinology

Rhinology has in recent times shown the steepest growth curve with surgeons constantly breaching all known limitations and thresholds. The advent of endoscopic surgeries of the base skull has gained momentum with teams of otorhinolaryngologists and neurosurgeons pairing up across institutions worldwide.

However, 'Good Old Rhinology' still holds its place.

There comes a time, when after mastering surgical skills, surgeons start ruminating about finer aspects to improve outcomes especially with regard to quality of life. And it is after such subtle refinements that proficiency ensues.

In this issue we have enlisted articles dealing with the finer aspects of chronic rhinosinusitis.
